

Condensed: family=horn_if_then | thinking=nothink | horn=0 | metric=accuracy

Line plots: x=maxvars, y=accuracy. Marker size ~ sqrt(n) for the metric denominator. Line segments connect only consecutive maxvars values.

Aggregated across all runs (provider-error rows excluded). Prompt IDs included: prompt_154dcb992a, prompt_73ecab0579, prompt_7b28aa32dc, prompt_c1b2be97aa, prompt_c6875730a1

Exact prompts: experiments/paper_outputs/prompts/prompt_catalog.md

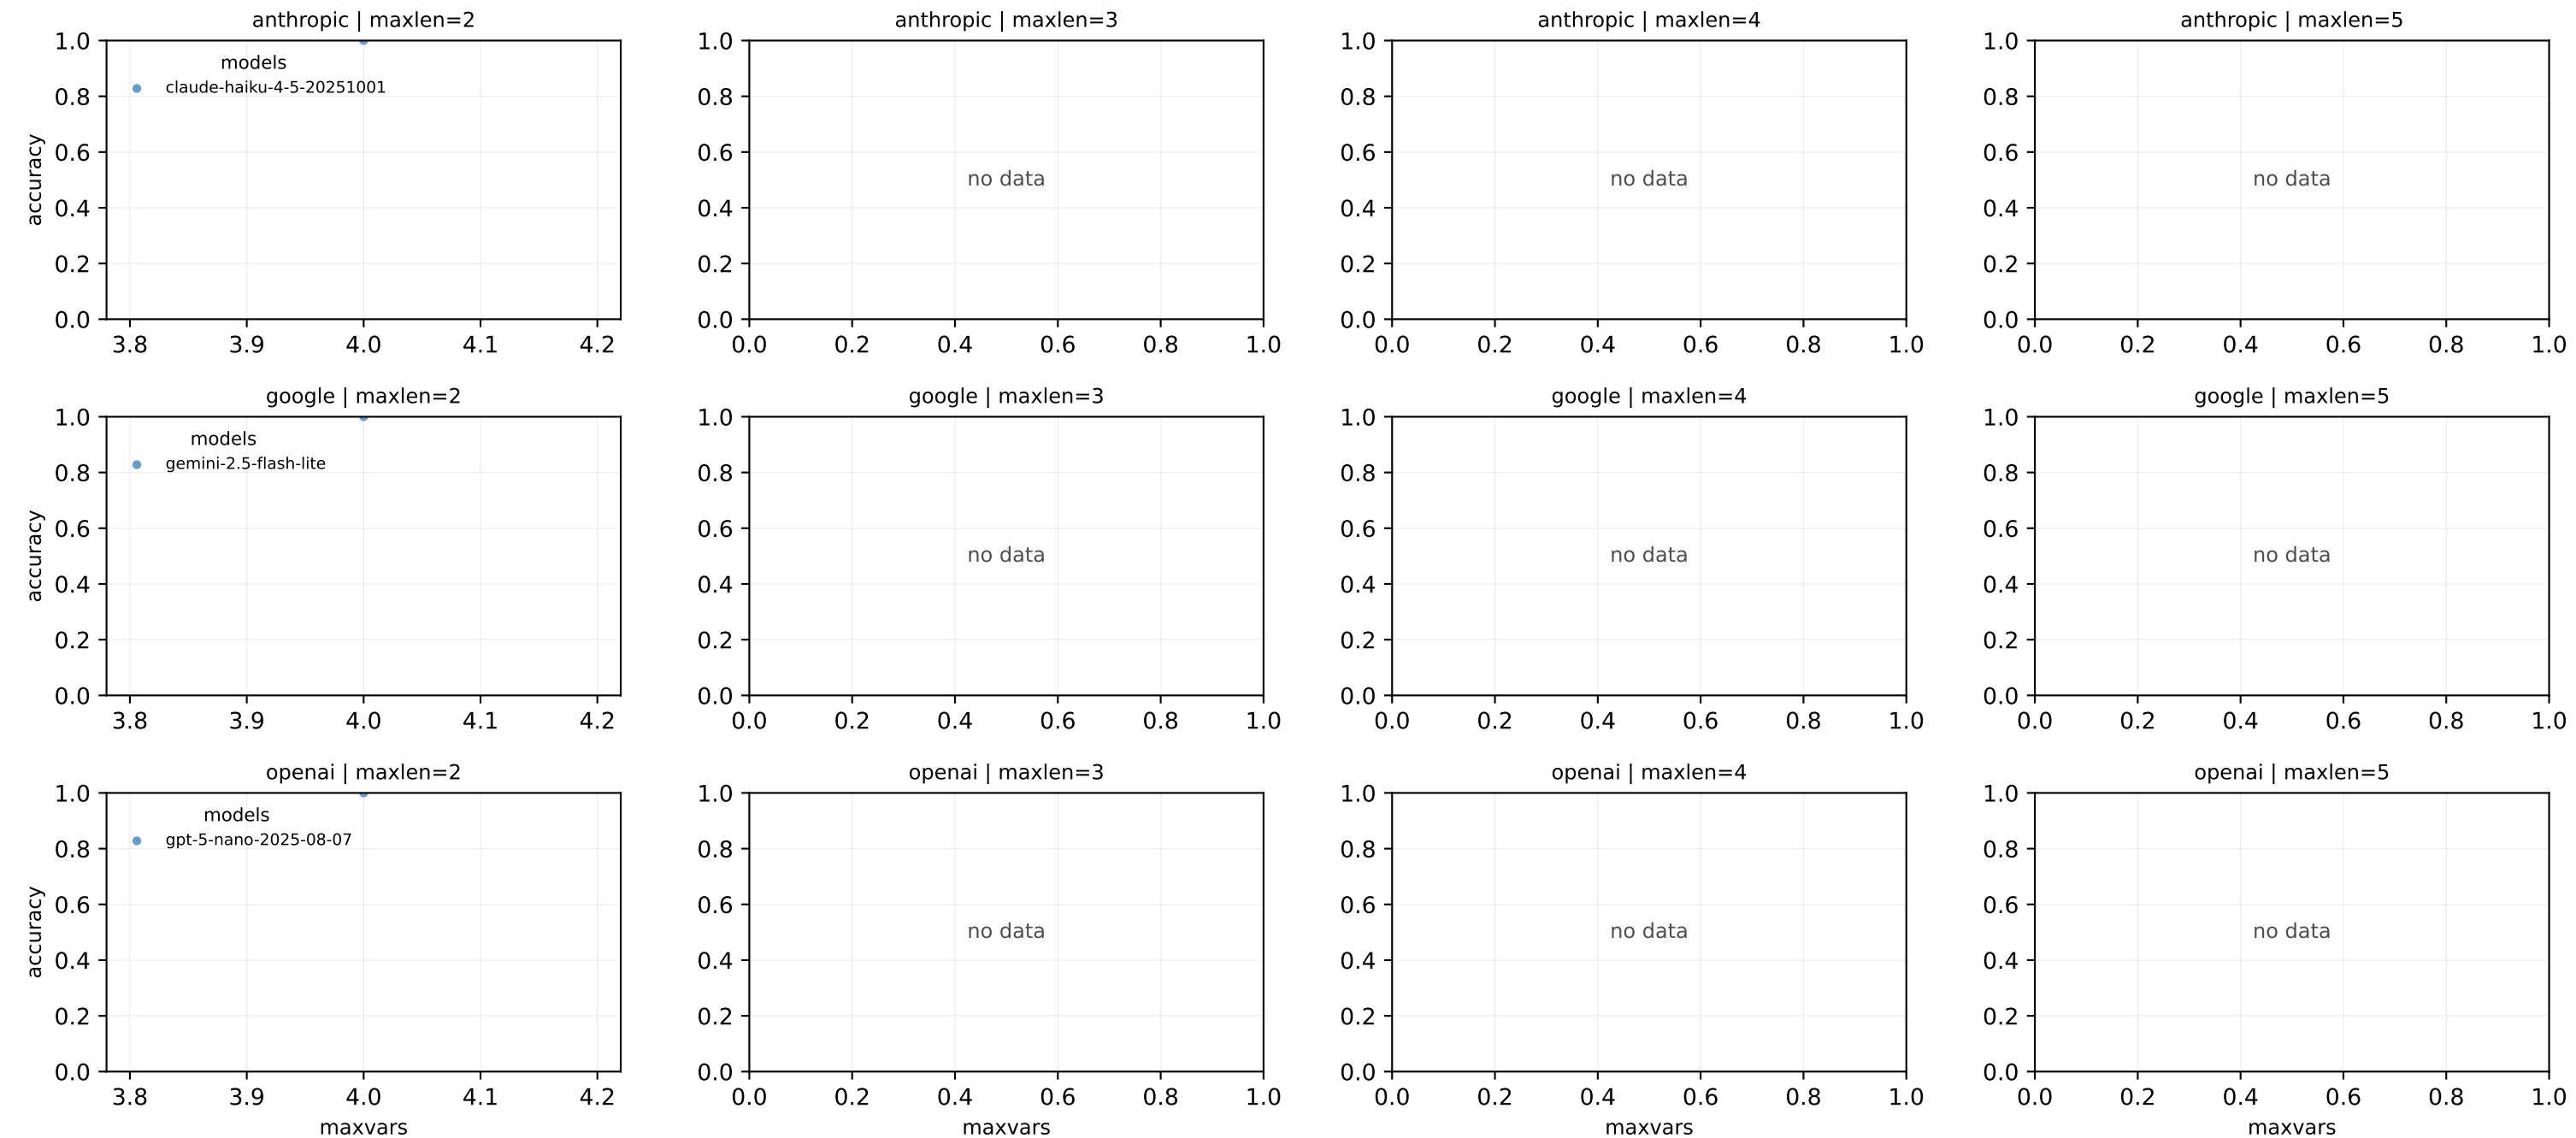

Condensed: family=horn_if_then | thinking=nothink | horn=0 | metric=sat_accuracy

Line plots: x=maxvars, y=accuracy. Marker size ~ sqrt(n) for the metric denominator. Line segments connect only consecutive maxvars values.

Aggregated across all runs (provider-error rows excluded). Prompt IDs included: prompt_154dcb992a, prompt_73ecab0579, prompt_7b28aa32dc, prompt_c1b2be97aa, prompt_c6875730a1

Exact prompts: experiments/paper_outputs/prompts/prompt_catalog.md

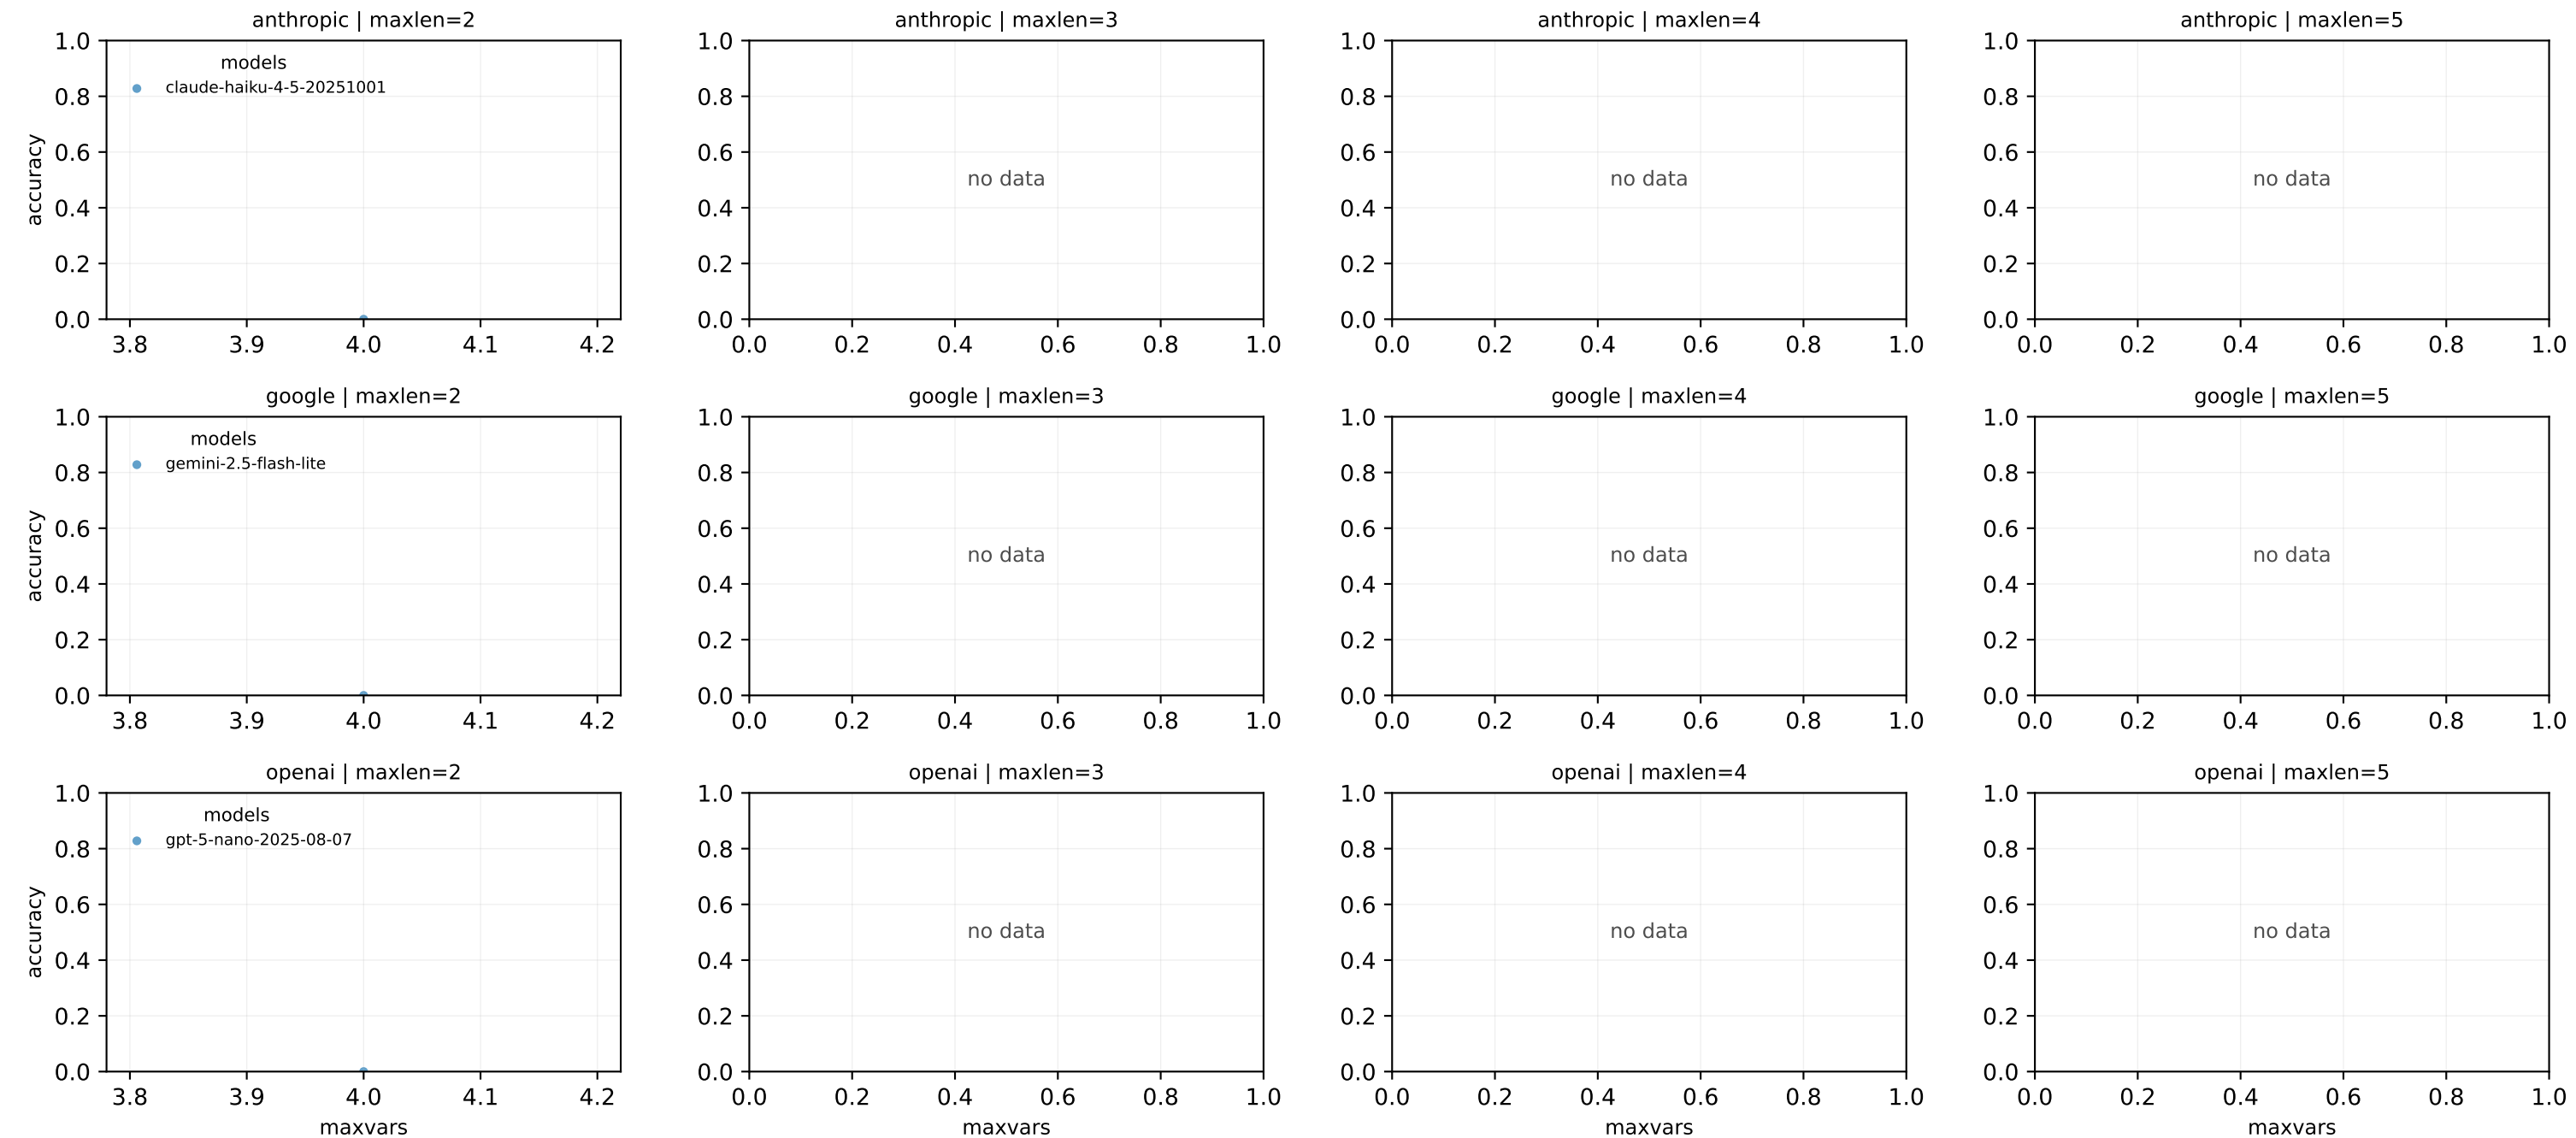

Condensed: family=horn_if_then | thinking=nothink | horn=0 | metric=unsat_accuracy

Line plots: x=maxvars, y=accuracy. Marker size ~ sqrt(n) for the metric denominator. Line segments connect only consecutive maxvars values.

Aggregated across all runs (provider-error rows excluded). Prompt IDs included: prompt_154dcb992a, prompt_73ecab0579, prompt_7b28aa32dc, prompt_c1b2be97aa, prompt_c6875730a1

Exact prompts: experiments/paper_outputs/prompts/prompt_catalog.md

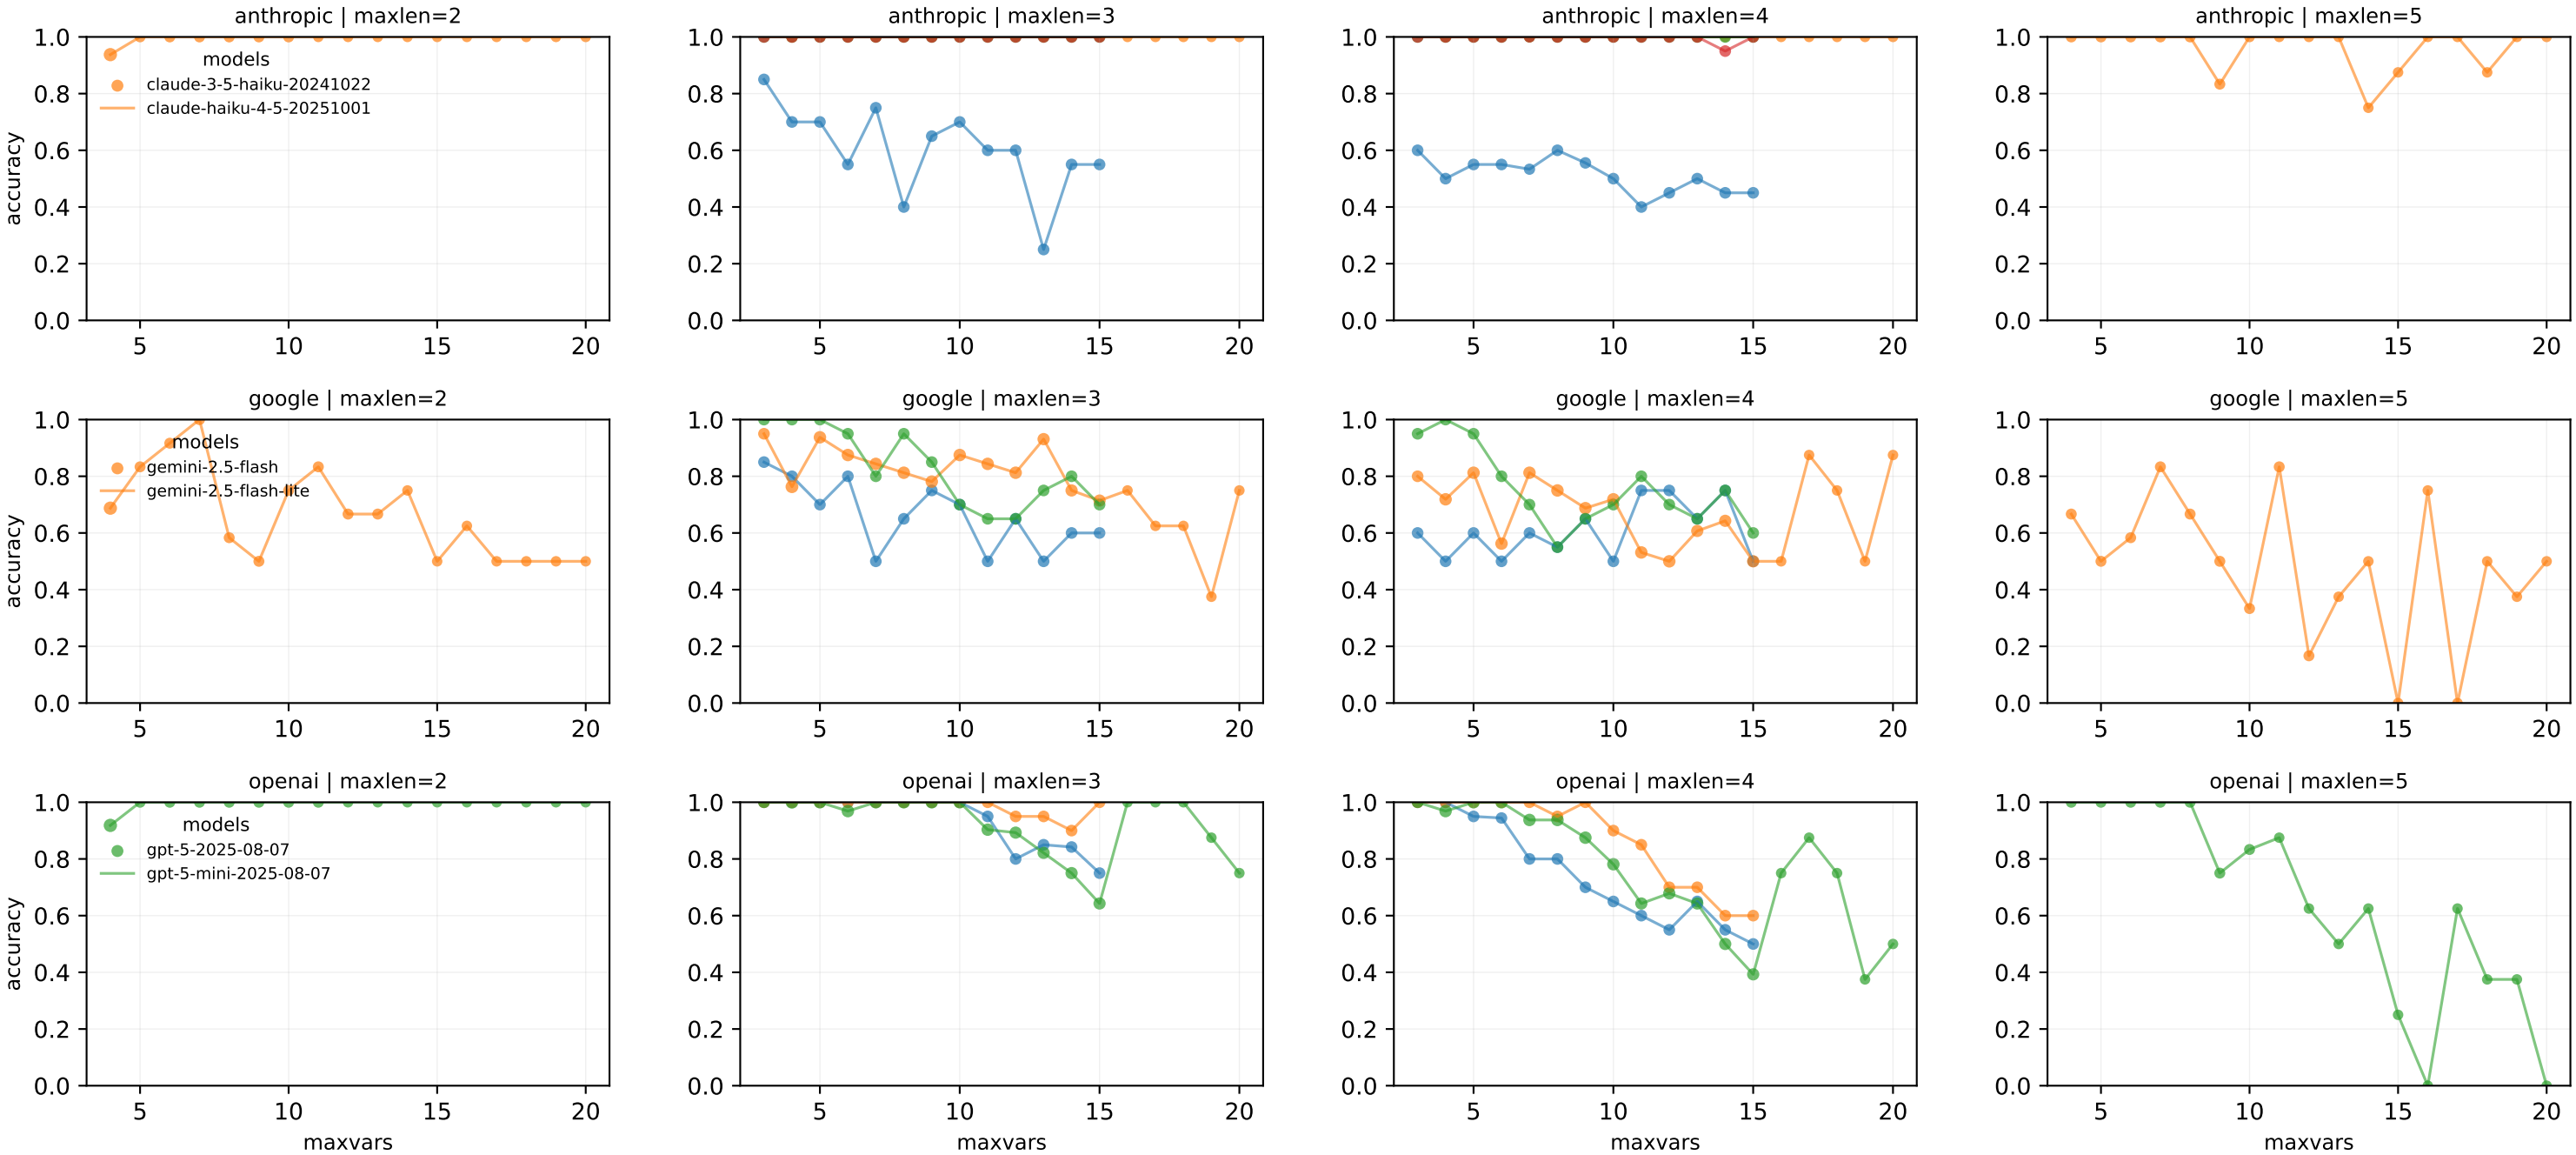

Condensed: family=horn_if_then | thinking=nothink | horn=1 | metric=accuracy

Line plots: x=maxvars, y=accuracy. Marker size ~ sqrt(n) for the metric denominator. Line segments connect only consecutive maxvars values.

Aggregated across all runs (provider-error rows excluded). Prompt IDs included: prompt_154dcb992a, prompt_73ecab0579, prompt_7b28aa32dc, prompt_c1b2be97aa, prompt_c6875730a1

Exact prompts: experiments/paper_outputs/prompts/prompt_catalog.md
